Computer Science student at the University of Maryland seeking Summer 2027 software engineering and data science internships

EDUCATION

University of Maryland | College Park, MD

Aug 2025 – May 2028

B.S. in Computer Science | Minors: Mathematics & Computational Finance | GPA: 3.88

- Office of Multi-Ethnic Student Education (OMSE) Award of Academic Excellence
- Coursework: Algorithms, Organization of Programming Languages (OCaml, Rust), Introduction to Data Science

CodeWizardsHQ, Software Development Track | Pre-college program, Remote

Sep 2021 – Sep 2024

- Completed a 3-year program building full-stack web apps with Python, Flask, REST APIs, SQL databases and Git

SKILLS

Languages: Java, Python, SQL, TypeScript, JavaScript, HTML/CSS

Frameworks & Libraries: Next.js, React, Flask, Tailwind CSS, Bootstrap, pandas, NumPy, SciPy, statsmodels, Matplotlib, scikit-learn

Data & Tools: PostgreSQL, Supabase, Jupyter, Git/GitHub, JUnit, Vercel, Salesforce

EXPERIENCE

Data Science Intern, INA Solutions Inc. | Remote

Jun 2026 – Jul 2026

- Built a pipeline using Llama 2 7B to generate synthetic CSV test data from a 56-table relational database schema
- Generated data was used to develop an analytical AI chatbot for two research-focused clients
- Wrote automated tests to check the generated data for integrity and correctness
- Documented the system with architecture diagrams, workflows and data models

Software Engineer Intern, Excelacom | Reston, VA

Jul 2024 – Jul 2024

- Supported a product-catalog rationalization project for a major telecom client that cut catalog complexity by 57%
- Analyzed 2,800+ billing codes for customer uptake and revenue patterns to flag consolidation candidates
- Performed data validation and customer-level analysis used in the team's code-mapping recommendations

PROJECTS

Success Metrics Dashboard | hackUMBC 2026, Winner: MLH Best Use of Tiger Data

Sep 2026

Python, pandas, SciPy, statsmodels, Matplotlib, Jupyter

- Led data analysis and visualization on a 2-person team, studying six UMBC alumni and student datasets
- Used ANOVA and regression to show first-job type explains ~20% of starting-salary variation vs. ~2% for major
- Designed the charts and built the models behind the team's AI advisor for student placement

Cleaning Scheduler | Client project for Mary's Cleaning Service

May 2026 – Present

Next.js, TypeScript, Supabase, Tailwind CSS, PostgreSQL

- Built a full-stack appointment manager with recurring scheduling for an active local business
- Created a dashboard and calendar view backed by a Supabase database
- Refined features based on regular feedback from the business owner

The Music Factory

May 2023 – Present

Python, Flask, SQL, HTML/CSS, Bootstrap

- Built a full-stack music education site with a database-backed system for managing learning resources
- Designed responsive, mobile-friendly pages using Bootstrap and custom CSS
